PROFESSIONAL SUMMARY

Innovative **full stack developer** with a keen interest in software development . Experienced using a wide-range of web technologies like HTML, CSS, JavaScript, React, TypeScript and more. Passionate about solving complex problems and using technical skills to build elegant, performing applications with scalable architecture and design patterns.

EXPERIENCE

Freelance Web Developer - Self-Employed
October 2021 - Current

- Developed full front-end websites for multiple clients in a range of industries from photography to concrete resurfacing utilising a variety of modern technologies including HTML, CSS, Sass, React (via Next.js) and TypeScript.
- Most Recent Project: www.slsconcretecoatings.com.au/

Technical Blogger
November 2021 - Current

- Manage a technical blog with articles on a variety of topics from algorithm solutions to front end development tutorials.
- Link to blog: blog.blakeyeboah.com

TECHNICAL PROJECTS

Bug Tracker - Full Stack Web Application
Source Code - Live Project

- Web application that allows users to manage issues/bugs in their projects and assign tasks to specific users to be completed.
- Built using React, Node.js, Express, MongoDB, TypeScript and Sass.
- Project is hosted on Heroku so it will take a second to spin up.

Financial Portal - Full Stack Web Application
Source Code - Live Project

- Web application that allows users to manage their finances by creating bank accounts with budgets and tracking income/expenses.
- Built using React, Node.js, Express, MongoDB and Sass.
- Project is hosted on Heroku so it will take a second to spin up.
